| **Schools Around the World**  
| **Focused Inquiry K-2** |

| **AUTHOR INFORMATION** |
| Author: Elaine Alvey  
| State: Georgia |

| **GENERAL INFORMATION** |
| Lesson Grade Span: K-3  
| Targeted Grade Level/Course: Elementary Social Studies  
| Estimated Time to Complete Lesson: 1, 40 minute class period (optional extension activity for second 40 minute class period) |

| **FOCUSED QUESTION** |
| How is school different for children around the world? |

| **STANDARDS (STATE/C3)** |
| - SSKG2 Explain that a map is a drawing of a place and a globe is a model of Earth.  
| - Georgia State Social Studies Information Processing skills: Compare and contrast; analyze documents |

| **STUDENT & TARGET OUTCOMES** |
| 1. Students will be able to identify South Korea on a world map |
2. Students will be able to build an argument regarding the differences of school for elementary children around the world by comparing and contrasting experiences and analyzing documents.

3. (Extension) Students will be able to develop appropriate topical questions to ask peers who students at the Peace School, located in the Korean DMZ zone, in order to craft pen pal letters.

## LESSON OVERVIEW

This inquiry leads students through an investigation of schools around the world, using a case study of elementary schools in South Korea. Students investigate the compelling question “How is school different around the world?” by evaluating images, videos and infographics about schools in a different part of the world. The formative performance tasks build on knowledge and skills through the course of the inquiry and help students see similarities and differences between their own lives and those of children living around the world. Students create an evidence-based argument about the ways in which schools are similar and different between cultures and geography.

It is important to note that this inquiry requires only introductory prerequisite knowledge of ideas and is designed to be accessible to students without previous study on these topics.

Note: This inquiry is expected to take one 40-minute class period. The inquiry time frame could expand if teachers think their students need additional instructional experiences (i.e., supporting questions, formative performance tasks, and featured sources).

### Structure of the Inquiry

In addressing the compelling question “How is school different for children around the world?” students work through a supporting question, formative performance task, and featured sources in order to construct an argument supported by evidence while acknowledging competing perspectives.

### Staging the Compelling Question

In staging the compelling question, “How is school different for children around the world?” teachers may prompt students with the presentation of the video clip with images from schools around the world and the video clip of children explaining why school is important to them. Teachers may also introduce the UN’s universal declaration of the rights of children. This can
be used as an opportunity to discuss the rights of children and identify access to education and schooling as a central right, that not all children have access to.

This discussion can be followed with an introduction of the South Korean case study which will inform the remainder of the inquiry. Students can work to identify the Korean Peninsula on a map in order to build background knowledge and connection.

**Supporting Question 1**

The first supporting question—How is school similar and different for children in the United States and South Korea?—has students work with the images and video clips to create a Venn Diagram of the differences in elementary school between the two countries. The formative performance task asks students to ground the Venn Diagram in the evidence provided in the featured sources. The featured sources for this question are each related to the experiences of children in schools. Featured Source A is a video tour of an elementary school in South Korea paired with a set of images from South Korean public schools. Featured Source B is a set of photos of school lunches, so that students can identify seminaries and differences. Featured Source C is an infographic related to the school day and year length that students in South Korea experience (These are introductory statistics and presented visually, but young students may need scaffolding to make meaning of these statistics).

**PROCEDURES**

1. Students should be introduced to the question driving the inquiry
2. Students will be introduced to the case study used in this inquiry and should find Korea on a world map
3. Class will watch introduction video
4. Students will then analyze the documents provided in sources A, B, & C as they work to craft an argument about the differences between schools in different parts of the world
5. (Extension) students will then have the opportunity to develop questions and pen pal letters to primary students at the Daesungdong Elementary School, located in Taesung Freedom Village, along the DMZ. Students will be introduced to this task using the current events stories below about this special school.

**FORMATIVE ASSESSMENT**

At this point in the inquiry, students have examined the school building, day, subjects, lunches and schedules of schools in South Korea. Students will have also drawn on their own experiences in order to create a Venn diagram comparing the two sets of school related experiences.
Students should be expected to demonstrate the breadth of their understandings and their abilities to use evidence from multiple sources to support their claims. In this task, students construct an evidence-based argument using multiple sources to answer the compelling question How is school different around the world? It is important to note that students’ arguments could take a variety of forms, including a detailed outline, poster, or essay. Students’ arguments will likely vary, but could include any of the following:

- *In other parts of the world, students have to wear uniforms to school.*
- *Classrooms around the world look mostly similar—they have tables and chairs*
- *Children learn similar subjects*
- *Children in other parts of the world have bigger/smaller classes*
- *The school day is longer and the school year is longer in most other countries*
- *School is important in most countries around the world*
- *The food is different/similar in these ways...*

To extend their arguments, teachers may have students conduct research on the educational systems and experiences of children in other countries. Some resources appropriate for young learners can be found at the United Nations (UNICEF) children’s page. Students have the opportunity to Take Informed Action by drawing on their understandings of schools around the world. To understand, students can learn about how many children don’t have access to education around the world. To assess the issue, students watch a video clip from the UNICEF collection and see conditions for students and teachers around the world. To act, students talk to their peers about the importance of school and education, they might choose to extend this communication to by creating a poster for the classroom or school hallway.

**Featured Source** | **Source B:** Children’s Universal Rights from United Nations
UN Convention on the Rights of the Child
In Child Friendly Language

"Rights" are things every child should have or be able to do, all children have the same rights. These rights are listed in the UN Convention on the Rights of the Child. Almost every country has agreed to these rights. All the rights are connected to each other and are all equally important. Sometimes, we have to think about rights in terms of what is best for children in a situation, and what is critical to life and protection from harm. As you grow, you have more responsibility to make choices and exercise your rights.

Article 1: Everyone under 18 has these rights.

Article 2: All children have these rights, no matter who they are, where they live, what their parents do, what language they speak, what their religion is, whether they are a boy or girl, what their culture is, whether they have a disability, whether they are rich or poor. A child should be treated fairly in any way.

Article 3: All adults should do what is best for you. When adults make decisions, they should think about how their decisions will affect children.

Article 4: The government has a responsibility to make sure your rights are protected. They must help your family to protect your rights and create an environment where you can grow and reach your potential.

Article 5: Your family has the responsibility to help you learn to exercise your rights, and to ensure that your rights are protected.

Article 6: You have the right to be safe.

Article 7: You have the right to a name, and this should be officially recognized by the government. You have the right to a nationality (to belong to a country).

Article 8: You have the right to be an identity—an official record of where you were born. You should take this away from you.

Article 9: You have the right to live with your parents, unless it is for your own best interest. No one should take this away from you.

Article 10: You have the right to live with a family who cares for you.

Article 11: You have the right to live in a country that you own entirely, you have the right to live together in the same place.

Article 12: You have the right to be protected from kidnaping.

Article 13: You have the right to your opinions, and for adults to listen and take it seriously.

Article 14: You have the right to find out things and share what you think others, by talking, sharing, writing, or in any other way. adults or other people.

Article 15: You have the right to choose your own religion and beliefs. Your parents should help you decide what is right and wrong, and what is best for you.

Article 16: You have the right to choose your own religion and beliefs. Your parents should help you decide what is right and wrong, and what is best for you.

Article 17: You have the right to go to school, to learn, to play, to rest.

Article 18: You have the right to go to school, to learn, to play, to rest.

Article 19: You have the right to be happy and entertained, by body or mind.

Article 20: You have the right to special care and help if you cannot live with your parents.

Article 21: You have the right to be cared for and protected if you are adopted or looked after.

Article 22: You have the right to protection from war that harms you, and it is hard for your health and well being. If you need, you have the right to be safe and loved family.

Article 23: You have the right to protection from the armed forces, and from the drug trade.

Article 24: You have the right to be free from sexual abuse. Article 164 is also to kidnapping or sell you.

Article 25: You have the right to protection from sexual abuse. Article 164 is also to kidnapping or sell you.

Article 26: You have the right to protection from sexual abuse. Article 164 is also to kidnapping or sell you.

Article 27: No one is allowed to punish you in a cruel or harmful way.

Article 28: You have the right to education, and freedom from work. Children under 15 cannot be forced to go to the army or take part in war.

Article 29: You have the right to help if you've been hurt, neglected or badly treated.
